

# DO YOU HAVE WHAT IT TAKES TO HOST

## OPEN *Summer* OF CODE 2016

### Our offer

We offer you a bunch of enthusiastic students, a chance to profile yourself as a innovative organisation and a lot of visibility. The mentors and students tend to write about the location on social media and even on our blog. Besides that, we feature you on our website. And you can tell anyone you're hosting an innovative programme that's all about open innovation. Our students will be eternally grateful for your hospitality!

### Things we need

- Access to your building for 1 or more weeks between 4 - 29 July, including holidays
- Being able to place around 30 people in one or multiple rooms
- Easy to reach with public transport
- Having a stable and performing Wifi for 30+ connections, without too many restrictions
- The ability to leave some things, like screens, banners or other stuff behind
- Students should be able to enter around 8 a.m. and leave around 7 p.m.

### Things that would be nice

- The ability to give talks that are open for non-oSoc'ers (room for ~50 people)
- About 5 parking spots for the mentors
- Having a place nearby where the students can relax - Think a garden, park,....

### Technicalities

We use Github for our projects and we would like to livestream certain events.

In order to do this we need the following ports to be open on your internet network:

- 21: FTP
- 22: SSH
- 80: HTTP
- 443: HTTPS
- 1935: RTMP

Other ports that would be nice to have open: 25, 465, 587 (SMTP); 9993; 25565.
